E-Safety Policy Statement

ICT and the internet have become integral to teaching and learning within schools; providing children, young people and staff with opportunities to improve understanding, access online resources and communicate with the world all at the touch of a button. At present, the internet based technologies used extensively by young people in both home and school environments include:

- Websites
- Social Media, including Facebook and Twitter
- Web enabled mobile/smart phones
- Online gaming
- Learning Platforms and Virtual Learning Environments
- Video broadcasting, including Chat Roulette, Omegle
- Blogs and Wikis
- Email, Instant Messaging and Chat Rooms

Whilst this technology has many benefits for our school community, we recognise that clear procedures for appropriate use and education for staff and pupils about online behaviours, age restrictions and potential risks is crucial.

All schools have a duty to ensure that children and young people are protected from potential harm both within and beyond the school environment. Every effort will be made to safeguard against all risks, however it is likely that we will never be able to completely eliminate them. Any incidents that do arise will be dealt with quickly and according to policy to ensure that children, young people and staff continue to be protected.

Aims

- To emphasise the need to educate staff, children and young people about the pros and cons of using new technologies both within, and outside of, the school environment.
- To provide safeguards and rules for acceptable use to guide all users in their online experiences.
- To ensure adults are clear about procedures for misuse of any technologies both within and beyond the school or educational setting.
- To develop links with parents/carers and the wider community ensuring input into policies and procedures with continued awareness of the benefits and potential issues related to technologies.

Scope of policy

This policy applies to all staff, pupils, governors, visitors and contractors accessing the internet or using technological devices on school premises. This includes staff or pupil use of personal devices, such as mobile phones or iPads which are brought onto school grounds. This policy is also applicable where staff or individuals have been provided with school issued devices for use off-site, such as school laptop, iPad or work mobile phone.

Staff Responsibilities

Teaching and Support Staff (including volunteers)

All staff have a shared responsibility to ensure that children and young people are able to use the internet and related technologies appropriately and safely as part of the wider duty of care to which all who work in schools are bound.

(Please see NCC Acceptable Use Policy for School Based Employees for further details regarding staff responsibilities and expectations for behaviour whilst accessing the internet, email or related technologies within and beyond school. A copy of this document is made available to all staff and shared with any volunteers, visitors or contractors.)

Network Manager/Technical Staff

The Headteacher/Computing Subject Leader is responsible for ensuring:

- that the school's ICT infrastructure is secure and not open to misuse or malicious attack.
- that anti-virus software is installed and maintained on all school machines and portable devices.
- that the school's filtering policy is applied and updated on a regular basis and that responsibility for its implementation is shared with the E Safety Lead and the Designated Person for Safeguarding.
- that any problems or faults relating to filtering are reported to Designated Person for Safeguarding and to the broadband provider immediately and recorded on the e Safety Incident Log.
- that users may only access the school's network through a rigorously enforced password protection policy, in which passwords are regularly changed.
- that he/she keeps up to date with e safety technical information in order to maintain the security of the school network and safeguard children and young people.
- that the use of the school network is regularly monitored in order that any deliberate or accidental misuse can be reported to the Designated Safeguarding and E-Safety Lead.

Children and Young People

Children and young people are responsible for:

- Using the internet and technologies in a safe and responsible manner within school.
- Informing staff of any inappropriate materials, cyberbullying or contact from unknown sources (age dependant)
- Actively participating in the development and annual review of the Responsible Internet Use Rules [Appendix i].

Incident Reporting

In the event of misuse by staff or pupils, including use of the school network in an illegal, unsuitable or abusive manner, a report must be made to the Headteacher/Designated Person for Safeguarding immediately and the e-Safety Incident Flowchart followed. [Flowchart found in Appendix iii]

In the event of minor or accidental misuse, internal investigations should be initiated and disciplinary procedures followed where appropriate. Additionally, all security breaches, lost/stolen equipment or data, unauthorised use or suspected misuse of ICT should be reported immediately to the Headteacher or Network Manager.

All incidents must be recorded on the E-Safety Incident Log to allow for monitoring, auditing and identification of specific concerns or trends. An example of the information kept in the log is found in Appendix ii.

Monitoring

School ICT technical staff regularly monitor and record user activity, including any personal use of the school ICT system (both within and outside of the school environment) and users are made aware of this in the NCC Acceptable Use Policy.

The Curriculum

The school strives to embed e Safety in all areas of our curriculum and key online safeguarding messages are reinforced wherever ICT is used in learning.

- The school Computing Curriculum incorporates teaching about e-safety and safeguarding units from CEOP for all year groups with National Curriculum statutory objectives for Computing.
- Pupils are made aware of copyright issues, data protection, intellectual property and reliability of information sourced on the internet as part of the e-Safety curriculum.
- Opportunities for informal discussions with pupils about online risks and strategies for protecting yourself online are built into our curriculum, to ensure that our pupils are armed with accurate information.
- Pupils, parents and staff are signposted to national and local organisations for further support and advice relating to e safety issues, including Cybermentors, BeatBullying, Childline and CEOP

Pupils with additional learning needs

The school strives to provide access to a broad and balanced curriculum for all learners and recognises the importance of tailoring activities to suit the educational needs of each pupil. Where a pupil has specific learning requirements, or poor social understanding, careful consideration is given to the planning and delivery of e-Safety awareness sessions and internet access.

Email Use

Staff

- The school provides all staff with a professional email account to use for all school related business, including communications with children, parents and carers. This allows for email content to be monitored and protects staff from the risk of allegations, malicious emails or inappropriate contact with children and their families.
- Under no circumstances will staff members engage in any personal email communications (i.e. via hotmail or yahoo accounts) with current or former pupils outside of authorised school systems.
- All emails should be professional in tone and checked carefully before sending, just as an official school letter would be.
- Staff should inform their line manager or the e Safety Lead if they receive an offensive or inappropriate email via the school system.

Pupils

- The school provides email accounts for pupils to use as part of their entitlement to understand different ways of communicating and using ICT to share and present information.
- Pupils will use their school-issued email account for any school related communications, including homework or correspondence with teachers. Email content will be subject to monitoring and filtering for safeguarding purposes.
- Pupils will be taught about email safety issues, such as the risk of exposing personal information, opening attachments from unknown sources and the management of

inappropriate emails. Pupils will also be guided in the correct tone to use in email correspondence and regularly reminded of restrictions on abusive or inappropriate content.

- The forwarding of chain letters is strictly prohibited in school and should be reported to a member of staff immediately.

Both

- It is the responsibility of each account holder to keep their password secure and to report any suspected breaches of password security to the Headteacher or e-Safety Lead. Account holders must never share their password with another user, or allow access to their email account without the express permission of the Headteacher.

Managing remote access

As technology continues to develop at an exponential rate, schools and their staff are increasingly taking advantage of opportunities for off-site access to the school network and e-mail using remote access facilities. For data security and safeguarding purposes, it is crucial that staff are aware of the following restrictions on use:

- Only equipment with the appropriate level of security should be using for remote access (i.e. encryption on any devices where sensitive data is stored or accessed)
- Log-on IDs and PINs should be confidential and use information that cannot be easily guessed (e.g. date of birth, telephone number, number patterns)
- For security purposes, network access information should not be written down or stored with the device in case of theft or unauthorised access.

Internet Access and Age Appropriate Filtering

Broadband Provider: Schools Broadband

All pupils are entitled to safe and secure internet access and schools have a duty to deliver this as part of the learning experience. The Headteacher is ultimately responsible for ensuring that the school infrastructure and network is as safe and secure as is reasonably possible and that age appropriate internet filtering is in place to protect young users from inappropriate or harmful online content. To this end, the school has the following filtering measures in place:

- Filtering levels are managed and monitored in school via an administration tool/control panel, provided by our broadband supplier, which allows an authorised staff member to instantly allow or block access to a site or specific pages and manage user internet access.
- Age appropriate content filtering is in place across the school, ensuring that staff and pupils receive different levels of filtered internet access in line with user requirements (e.g. Youtube at staff level but blocked to pupils)
- All users have unique usernames and passwords to access the school network which ensures that they receive the appropriate level of filtering. Class log-ins, dependent on age, may also be used.
- Any changes to filtering levels are documented on the Filter Change Request Log (Appendix A) and include the reason for the requested change, the date and name of staff member concerned. For audit trail purposes, signed consent from either the Headteacher or e-Safety Lead must be received before the request can be actioned.

In addition to the above, the following safeguards are also in place

- Anti-virus and anti-spyware software is used on all network and standalone PCs of laptops and is updated on a regular basis.

- A firewall ensures that information about children and young people cannot be accessed by unauthorised users.

Children and parents should be aware that even with filtering systems, children may still be able to access inappropriate content. We teach the children how to react (close laptop or switch of the device/monitor immediately) if this happens and always tell the adult supervising them straight away.

Staff

- Expectations for staff online conduct is addressed in the NCC Acceptable Use Policy for School based employees.
- Staff are required to preview any websites before use, including those which are recommended to pupils and parents for homework support.

Use of School and Personal ICT Equipment

School ICT Equipment

- A log of all ICT equipment including serial numbers, is maintained by the Administrator in the Inventory kept in the office.
- Personal or sensitive data is not stored on school devices (e.g. laptops, iPads, PC or USB Memory Sticks) unless encryption software is in place. This is true also of any photographs or videos of pupils, such as class photos or assembly evidence. All such material should be stored either on the school network or on an encrypted device.
- Time locking screensavers are in place on all devices in school to prevent unauthorised access, particularly on devices which store personal or sensitive data. If a computer needs to be left, the screen must be locked to ensure that sensitive data is not able to be accessed.
- Personal ICT equipment, such as laptops or memory sticks, must not be connected to the school network without explicit consent from the Network Manager or Computing Subject Leader and a thorough virus check.

Mobile/Smart Phones

Pupil use:

- Pupils are not permitted to bring mobile phones/devices onto school grounds unless express permission has been granted by the Headteacher for exceptional circumstances (e.g. independent journey to and from school) Where mobile phones have been allowed in the above circumstances, the device will be turned off and locked away by a responsible adult at the start of the school day and returned to the pupil before their homeward journey.

Staff use:

- Personal mobile phones are permitted on school grounds, but should be used outside of lesson time only.
- It is the responsibility of the staff member to ensure that there is no illegal or inappropriate content stored on their device when brought onto school grounds.
- Personal mobile phones should never be used to contact children, young people or their families, nor should they be used to take videos or photographs of pupils. School issued devices or memory cards **only** should be used in these situations.

Laptops/ iPads

- Staff must ensure that all sensitive school data is stored on the network (shared drive) and not solely on the laptop or device, unless the device is encrypted. In the event of loss or theft, failure to safeguard sensitive data could result in a serious security breach and subsequent fine. Password protection alone is not sufficient.
- Personal use of school laptops or computing facilities, whilst on site, is left to the discretion of the Headteacher and may be permissible if kept to a minimum, used outside of lesson times and does not interfere with an employee's work.
- Staff are provided with laptops to allow for school related work to be completed off site. Personal use of the laptop from home (such as web browsing/online shopping etc) is permitted but should be kept to a minimum and use of the device is strictly restricted to the authorised member of staff only (i.e. not family members).
- Staff are aware that all activities carried out on school devices and systems, both within and outside of the school environment, will be monitored in accordance with this policy.
- Staff will ensure that school laptops and devices are made available as necessary for anti-virus updates, software installations, patches, upgrades or routine monitoring/servicing.

Removable Media (Memory Sticks/USB)

- Where staff may require removable media to store or access sensitive data (e.g. IEPs, pupil attainment and assessment data) off site, every attempt should be made to keep the data secure (never leaving equipment unsecured, leaving screens so that others can view sensitive data).
- Any passwords used for encrypted memory sticks/or other devices will remain confidential to the user and shared only with authorised IT personnel for security and monitoring purposes.

Photographs and Video

Digital photographs and videos are an important part of the learning experience for children and young people and, as such schools have a responsibility, to ensure that they not only educate pupils about the safe and appropriate use of digital imagery, but also model good practice themselves. To this end, there are strict policies and procedures for staff and young people about the use of digital imagery within school.

- Written consent will be obtained from parents or carers before photographs or videos of young people will be taken or used within the school environment, including the school website, Twitter feed, Facebook or associated marketing material.
- Permission will be sought from any pupil or staff member before an image or video is taken and the purpose of the activity and intended use of the image will be made clear.
- Staff are not permitted to use personal devices, such as cameras, video equipment or camera phones, to take photographs or videos of pupils. However, in exceptional circumstances, such as equipment shortages, permission may be granted by the Headteacher for use of personal equipment for school-related photographs or videos, provided there is an agreed timescale for transfer and deletion of the image from the staff member's device.
- Where photographs of pupils are published or displayed (e.g. on the school website) first names only will be displayed. Best practice would be to use non-identifying captions (e.g. Year 6 pupil playing football).
- Images should never show young people in compromising situations or inappropriate clothing (e.g. swimming costumes).

Video conferencing

- Permission is obtained from parents and carers prior to their child's involvement in video conferencing.
- All pupils are supervised by a member of staff when video conferencing, particularly when communicating with individuals or groups outside of the school environment (e.g. international schools)/
- All video conferencing activities are time logged and dated with a list of participants.

Parent/Carer Involvement

As part of the schools commitment to developing e-safety awareness amongst children and young people, every effort is made to engage parents and carers in the process.

- All pupils and their parents/carers will receive a copy of the E-Safety Rules (Appendix B) on first time entry to the school. Pupils and their parents/carers are both asked to read and sign acceptance of the rules, a copy of which will be stored at school.
- E-Safety parent/carer sessions are run in school or through the Sponne Cluster of schools to raise awareness of key internet safety issues and highlight safeguarding measures in place within school.
- Wherever possible, and subject to prior arrangement, the school will endeavour to provide parents/carers without internet access to research online safety materials and resources.

Blakesley CE Primary School

Rules for Responsible Internet Use

The school has installed computers and Internet access to help our learning. These rules will keep everyone safe and help us to be fair to others.

- I will use my school passwords to access the computer network and internet.
- I will not access other people's folders
- I will only use the computers for school work and homework.
- I will not bring in CDs or DVDs from outside school unless I have been given permission.
- I will only e-mail people I know, or my teacher has approved.
- I will not give out my full name, home address or telephone number, or arrange to meet someone.
- I will make sure that I only send kind and polite messages.
- I will report any unpleasant material or messages sent to me. I understand my report will be confidential and would help protect other pupils and myself.
- I understand that the school will check my computer files and will monitor the Internet sites I visit.
- I must ask permission to use the school printers.
- If I break the rules my teacher may stop me using the computers.

Child's Name: _____ Parents signature: _____

Child's signature: _____ Date: _____

The school accepts no responsibility for inappropriate use of the Internet outside school, even when children are researching a school based subject.

Please see Thinkuknow.co.uk for advice about how to keep children safe when using the internet at home.

School Use of Social Media including Facebook and Twitter

The three named administrators are Tracey Johnson, Anne Carter and Lucy Burman.

The school will only add people as friends if they have an association with the school or will have (future parents etc) and administrators will check each other or other friends if they are appropriate. Someone who has no mutual friends should ring alarm bells.

Photos will only be put on the site (public or private one) if other children, not at our school, can't be identified.

We will only use photos of children whose parents have given permission. If a photo is posted in error by us or by another user on our sites, we will remove it as soon as possible or ask the poster to do so.

In our private Facebook community, we will keep our settings so that only Friends can see our posts.

All posts linked to our site will need to be approved by admin.

All posts/photos etc from school should be posted via the administrators and not from the personal FB pages of staff.

Twitter and our 'public Facebook page' – we will ensure that all photos are not of an embarrassing nature and we will always ask ourselves if they would be acceptable for publication on any public forum eg. a national newspaper.

Appendix ii

Example E-Safety Incident Log

Details of ALL eSafety incidents to be recorded by the eSafety Lead. This incident log will be monitored termly by the Head teacher, Designated Person for Child Protection or Chair of

Date of incident	Name of individual(s) involved	Device number/location	Details of incident	Actions and reasons	Confirmed by
1/10/10	Joe Bloggs	PC 63 Rm 4	Child accessed inappropriate chat site using child log-in. Adult language and pornographic images viewed.	Hector Protector launched effectively by young person. Synetrix help desk contacted. Website now blocked and filtering levels reviewed and altered.	Davey Jones (Deputy Head CPO)

E-Safety Incident Flowchart
